Carrier

The Future of Buildings  
**STARTS WITH ABOUND**

We see a future where buildings are more than just static structures. We see them as dynamic environments – healthy, safe, sustainable, intelligent spaces that deliver tangible benefits for owners, operators and occupants.

That future is here – and it starts with Abound™ by Carrier. Abound is a cloud-based digital platform and a suite of solutions that uses advanced technologies to enable real-time, intelligent, outcome-based results that make buildings healthier, safer, more efficient and responsive.

With Abound Health & Well-Being Solutions, you can monitor indoor air quality and occupant density in your buildings to gain actionable insights on how to improve the health and productivity of those inside.

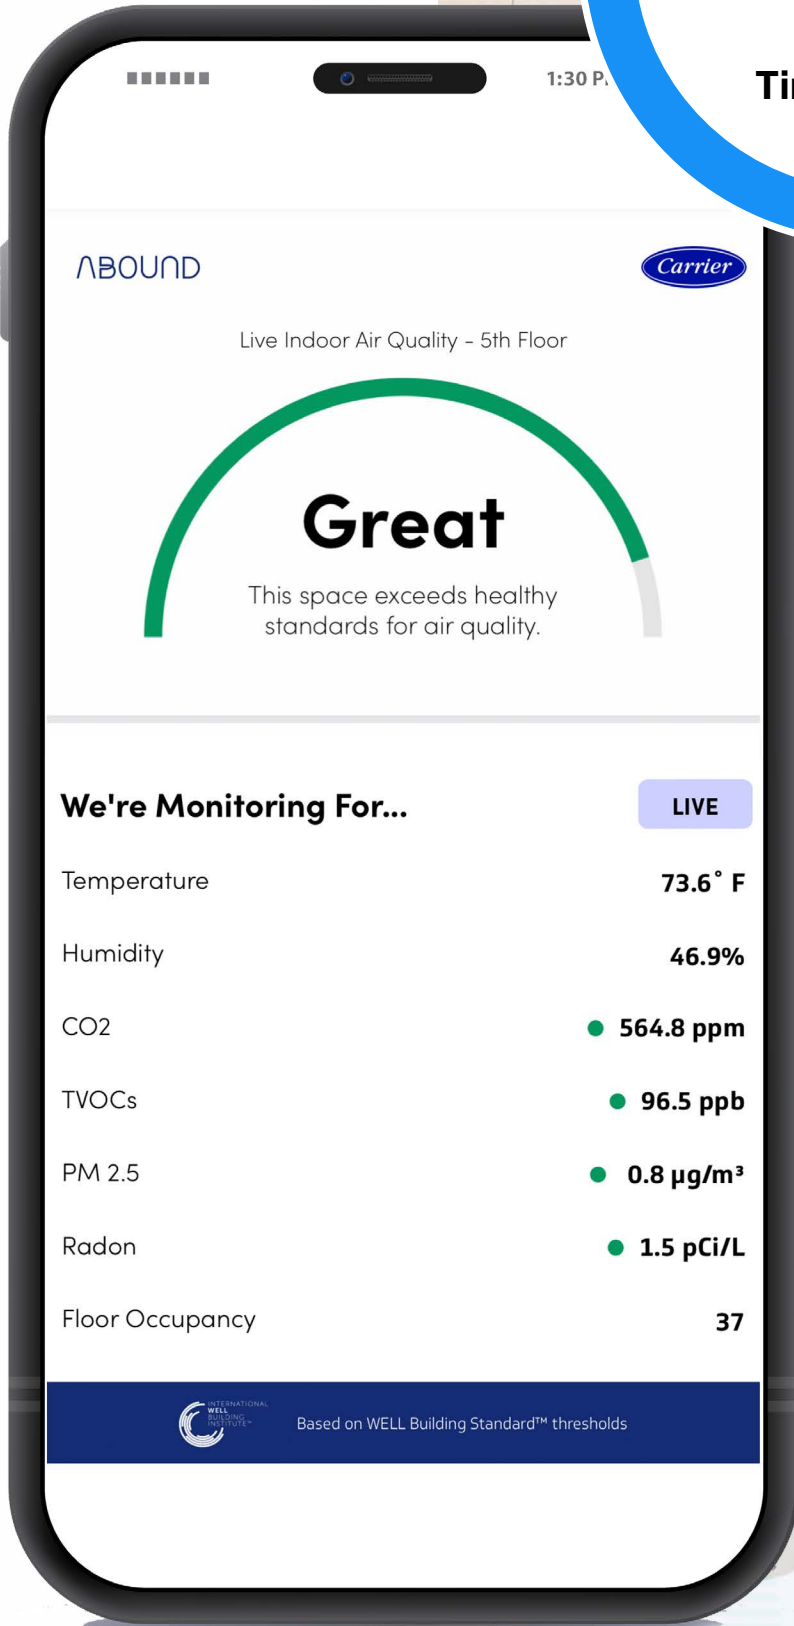

# How Healthy is Your Indoor Air? Abound Knows.

Expectations about air quality in indoor environments have changed. People spend 90% of their time indoors and want to feel confident that the spaces they are occupying are healthy and safe. Today's buildings need to provide that reassurance.

## Abound Healthy Air in Action:

- Monitor real-time and historical indoor air quality (IAQ) data, including carbon dioxide, particulate matter, volatile organic compounds, temperature, humidity, radon and more, by room, floor, building or for an entire portfolio of buildings
- Benchmark IAQ numbers against science backed standards and receive alerts when levels move outside normal ranges
- Build confidence in the quality of indoor spaces for tenants, occupants, and visitors

# The Abound Healthy Air Offering

## Visualize

See a unified view of all IAQ sensor readings, across all buildings, in one intuitive interface

## Analyze

See how your IAQ readings compare to the International WELL™ Building Standard and get alerted if they move outside of a normal range

## Optimize

Use insights and suggestions to take action to improve IAQ

## About Healthy Air Is Rich with Features:

- ✓ **IAQ Sensing** - Our wireless IAQ sensors are easy to install, and monitor and measure multiple air quality indicators
- ✓ **IAQ Sensor Integration** - Integrate new or existing IAQ sensor data from your building management system (BMS)
- ✓ **IAQ Visualization** - Get a real-time, unified view of all sensor readings
- ✓ **IAQ Health Scores** - Compare your IAQ readings to the International WELL™ Building Standard
- ✓ **IAQ Alerts & Analysis** - Receive notifications if IAQ levels move outside of a healthy range, share information via email and set up automatic alerts
- ✓ **IAQ Insights & Optimization** - Get historical information, detailed insights and suggestions to optimize IAQ

Carrier knows a lot about indoor air quality. Let us help you improve yours with the Abound Healthy Air offering.
